

E.I.D. NEWS NOTES

NOTICE

Half damage must be reported to the office within twenty-four hours of its occurrence. No claim for adjustment will be recognized unless the loss is reported within such time.

As the District has re-insured a portion of its risk with a regular liability insurance company this regulation must be rigidly observed.

Mr. H. K. McDeville has been the staff of the District as Fieldman. He is a qualified Civil Engineer of the Glasgow Technical College, and has had twenty years experience in irrigation and farm work in Alberta.

Rosemary

Mr. and Mrs. MacLeod, Betty and Donald are vacationing at Banff, Victoria and Vancouver.

Mr. and Mrs. H. McCaffrey from Turner Valley are visiting Mr. and Mrs. Robert and family.

Mr. and Mrs. J. Norbury were Brooks visitors on Wednesday.

The Rosemary High School students and their teacher, Mr. Arison celebrated the close of the school year by chartering the school bus and going to Crowfoot creek and the backwater on Thursday. Sports were included swimming, basketball, horse hunt and a hot ball game. The hungry students were satisfied by a huge lunch consisting of sandwiches, hot dogs, cake, ice-cream and lemonade. After bidding adieu to their teacher and expressing their hope in having him teach them again next year the students returned to their homes, in the anticipation of a joyous holiday.

A number of Rosemary people attended the stampede and dance in Basasso.

Mr. and Mrs. A.H. Newson and family are spending their holidays visiting in Agram.

Miss Betty Adams returned home from high-school in Medford, Ore., Wednesday night.

Miss Lenore Park, formerly of Rosemary, now living in Hinton, B.C., is spending a few days visiting her friends here before going to the coast for her holidays.

Mrs. Bailey and daughters Mrs. Smith and Mrs. Chapman from MacLeod and Mr. Max Ackroyd of Harty visited friends here for a few days. They returned home Sunday.

Mr. P. Pollock made a trip to Harwell Saturday.

Lathom Notes

Mr. and Mrs. A. Letourneau, Mr. and Mrs. S. Goelling were callers at the Deans home in Coonville on Sunday evening.

Mr. and Mrs. Chester Thompson of Queenswood are visiting at the home of Mr. and Mrs. L. Munro.

Catherine Warner is visiting her sister, Mrs. E. Downes in Basasso for a few days.

George Salmon and Stuart Warriner were callers in Duchess Tuesday.

Mr. and Mrs. Archie Talsman of Idelphigh spent the week-end at the home of J. C. Salmon.

Mr. and Mrs. Forest Cowan spent the week-end at the home of Mr. and Mrs. W. Cowan in Maplelake.

DANCE FRIDAY NIGHT

Don, Casey and Harry will supply the music at the L.O.P. Hall on Friday night, when a dance is to be held in honor of Basasso Newyears. Admission 25c. Ladies please bring liquor.

SALESMANSHIP—HIGH PRECISE

Gem, July 25th.—(Special)

We've known for years and years that Dr. Scott of Basasso is an exceptionally able physician, but now we've convinced that he really is his true callings. He should have been a salesman. Generously consenting to assist in the selling of tickets on the Hope Chest to be raffled at the Gem Stampede, Aug. 29, he proceeded to show us how to really sell tickets; selling a full book to individual persons in less than 10 minutes. This is some record! Thanks, Dr. Scott.

Town Council May Conduct Tax Sale

The July meeting of the Basasso Town Council was held in the Town Hall on Monday night last, with Mayor Playfair, and Councillors McKee, Morrison, Sherriff and Holmes present.

A report on the work recently completed on local streets was given by the Public Works Committee. The action of this Committee will be formed by the Council.

The Treasurer, Mr. J. R. Donaldson, reported that receipts for June had amounted to \$7,545.51, and that payments amounted to \$5,646.40 had been made in the month.

May Conduct Tax Sale

The Council conducted a lengthy discussion on the matter of arrears of Taxes in Basasso, and arrived at the conclusion that it would be necessary to hold a sale in the near future. The Secretary was directed to write to the Utilities Board with regard to this matter. Further information will be released at a future date.

Town Engineers Report

The Town Engineer, Mr. P. Mead, reported that one burial had been made in the local cemetery during the month. Considerable work had been done at the cemetery, the fence having been repaired, rotten posts replaced, and weeds cleaned up.

The fire tank in the water tower was repaired during the month and one water service was replaced. Both pumps at the pumping station near the dam were operated during the month and were in good condition.

The Auxiliary Gas Plant, located just south of town, was operated eight times during June and the engine and equipment were all reported to be in good condition.

Accounts for June

The following accounts were outstanding:

B. O. Co. Ltd.	\$ 452
Basasso M. of Trade	10,000
Alta. Gov. Telephone	14,000
Chas. Power	205.00
Bas. School Dist.	150.00
Pay Roll, June 1939	468.00
A. R. Maurer	2.50
Wing, Hogg	1.15
Flanagan Bros.	5.99
W. S. Playfair	15.79
City of Calgary	23.24
Andrew McKee	45
Stewart Brothers Ltd.	8.00
Miss M. Hansen	8.15
Montreal, Alberta	12.50
Bas. Mun. Hospital Dist.	1,153.00

Hospital Board Meet

The Hospital Board met on Saturday, July 15th, in the local hospital. All Board Members were present.

The Superintendent of Municipal Hospitals, Mr. W. A. Shultz, of Edmonton, the Department of Public Health, was also present, and a valuable discussion on various features of hospital administration took place.

Sixty five patients were treated in the hospital during the month of June. There were two deaths. The hospital incurred \$1,868.82 during the month. The meeting passed accounts for payment to a total of \$1,823.31.

The next meeting of the Board will be held on Saturday, August 6th.

CROP PROSPECTS HOLD UP

Since last week's issue was published, crop prospects in this District have again been encouraged by further heavy rains over the week-end. (Dry land farmers to the west report that their wheat is in excellent condition, and that the possibilities of a yield of from 10 to 20 bushels per acre are expected. A farmer of the Maplelake District reports his 779 crop as being five feet high at the present time.)

On the Irrigated Lands, crops are in perfect shape, having received sufficient moisture for this year. Fields on the lands are expected to run about the same as last year.

If present weather conditions hold over, the dried and hot days clear of the District, farmers will reap the first real crop they have had the privilege of growing for the past eight or ten years.

Approximately 500 Attend Stampede Fri.

A. R. Tateson, Idelphigh, Winner of Bucking Event.

MOST SUCCESSFUL STAMPEDE IN DECADE

Another July 1st has come and gone; another Dominion Day Celebration is a thing of the past—but this year's presentation is one that will long be remembered. Not for the past ten years has Basasso had such a successful day, considered from every angle. Both in finance and in entertainment value, the Board of Trade went over the top with the 1939 annual celebration. This will long be remembered as the year the Basasso Stampede staged a comeback.

And there are reasons for this. The Board of Trade is not only the most important, is the improved crop prospects in the district. As the day passed, and the young farmers felt reasonably about a fair crop, and the good rain which started to fall in the evening confirmed the Board of Trade in its opinion. In 1935, however, at a time when there was a great difference, there was another even more important reason. And that is the progressive policy pursued by the Board of Trade in the past few years with respect to the Stampede itself. Years ago the fairgrounds were situated a mile from town, south of the tracks and on the half-bred prairie. At that time the program consisted of straight horse racing, and the race track was a fair, and then for a few years that was done away with, and a straight sports program was substituted.

In 1935, however, at a time when there was a great difference, there was another even more important reason. And that is the progressive policy pursued by the Board of Trade in the past few years with respect to the Stampede itself. Years ago the fairgrounds were situated a mile from town, south of the tracks and on the half-bred prairie. At that time the program consisted of straight horse racing, and the race track was a fair, and then for a few years that was done away with, and a straight sports program was substituted.

Not content with these improvements, the Board also improved the program itself. Discontinued with the straight horse program, it restored the stampede idea, with bucking, rodeo, and which made it possible to hold the dance and carnival under the same roof.

Not content with these improvements, the Board also improved the program itself. Discontinued with the straight horse program, it restored the stampede idea, with bucking, rodeo, and which made it possible to hold the dance and carnival under the same roof.

There was some slight disappointment this year. While the bucking was not quite as good as last year it still made an enjoyable part of the program. Also, difficulty was experienced in getting the public address system set up so that the crowd had to hear the announcements at times. However, you may rest assured that both of these difficulties will be dropped out next year. There was one innovation this year that was very well received by the crowd and that was the boxing pit on the boys. These young fellows caused quite a bit of fun by knocking each other around, so much so that this part of the program was probably the most popular of the night. The result of the rest of the day's events will be found elsewhere in this paper.

The carnival at night has now become a big feature of the day, since it can be held without the danger of being spoiled by the weather as was the case in the past. The carnival at night has now become a big feature of the day, since it can be held without the danger of being spoiled by the weather as was the case in the past. The carnival at night has now become a big feature of the day, since it can be held without the danger of being spoiled by the weather as was the case in the past.

The carnival at night has now become a big feature of the day, since it can be held without the danger of being spoiled by the weather as was the case in the past. The carnival at night has now become a big feature of the day, since it can be held without the danger of being spoiled by the weather as was the case in the past.

Tourists Travel As Holiday Season Arrives

With the advent of the summer season, tourist traffic has noticeably increased through Basasso during the past week or ten days. Cars bearing license plates from Eastern Canada and United States points en route to the Western Coast have been seen on the local streets. Many of these tourists have stopped here for several hours, some of them overnight, and have commented favorably on the appearance of the town. Their remarks have been gratifying to say the least, and it is the duty of the citizens of Basasso to make their passing through this point a highlight of their trip.

There are several small improvements that could be made in town that would greatly improve its appearance, maybe not right at present, but in future years. One of these is the suggestion that trees be planted along both sides of the main highway leading into the west end of town, to where the highway joins Highway Avenue. The row should also be continued along Railway Avenue to the premises occupied by W. S. Playfair.

At present there are only a few scattered trees along this main road, which add practically nothing to the beauty of it. All side streets and roads in Basasso are lined with tall, old trees, and the improvements that these trees have made to the side streets is a fact well realized by all in Basasso. Then, why not have the same improvements on the main highway with trees, to wear out the impression of beauty and care for the appearance of the town?

Another suggestion is that a sign be constructed, directing tourists to the E. J. Dam located south of town. We in Basasso would not want to let any travellers from distant points, who have passed through here without inspecting one of the largest irrigation dams of its type in the world.

An immense attraction of this nature is not an attraction offered by many towns or cities of our Dominion—yet no one could direct tourists, or make them aware of the dam, without information on the dam can be seen anywhere in town.

These are two suggestions that we feel should be effected for the benefit of the travelling public and of the citizens and business men of Basasso. They are on the lookout for interesting places and beauty spots and the greater the impression made on them the longer they will remember Basasso, and the more apt they are to return when passing through here.

The Recorder would appreciate receiving letters for publication from those who are interested in improving the appearance of our town. Questions along this line would be readily received by any public-spirited citizen, and we are sure that the local Council and the Board of Trade would co-operate to the utmost in carrying out as many of them as they possibly could at the present time.

Mr. Henry Edwards, father of Mr. H. Edwards of Basasso, returned to Calgary on Sunday after visiting here for the past month.

Gem Notes

Rain Delays Hayting

We have had a lot of rain in Gem the past few days. It seems it can do nothing but rain! Many farmers have their hay down and they are anxiously waiting the drier for a rift in the clouds.

Teacher Home from Hanna

Betty Wallace who has taught in the Higgins district for the past two years, spent a few days at her home in Gem, before going to Edmonton to take a Summer School course at the University. Her mother accompanied her as far as Calgary.

Improving

Mr. Robinson, who reported, is much better, although he is still confined to his bed.

Summer Attend Stampede

Mr. and Mrs. Brown and Duce were well attended by Gemites. Those who "tripped the light fantastic" till present, but never experienced some difficulty getting home through the mud.

Teachers Return Home

The teachers of Gem returned home this week. Mr. Dunn and Mr. Rae have left for their respective homes. Edna Harwell has returned home to the premises occupied by her mother, Mrs. Brooks.

Visit Rainer

Mr. and Mrs. Sparks made a visit to Rainer to visit Barbara, Ruth and Jim, who are all working there.

To Hold Welcome Home

A welcome home will be held on Saturday at the Stampede grounds, commencing at 7 p.m. sharp. Don't bother about supper; you can get into eat at the booth. A swimming party will be supervised by the young people. There is a good programme of a number of novelty races, games, etc. Mr. Brown is organizing a "tag-o-war" match. No doubt, will be the big thrilling event.

Home from Calgary

Miss Lou Standen is spending a week with her parents, after which she will resume her Business Course studies in Calgary.

Working near Duchess

Elis Archibald is at present working near Duchess.

Prepare for Fall

Mr. Standen left for Calgary on Wednesday to make arrangements for lumber for the fall.

Visit former home

Mr. W. R. Pollock of Calgary is visiting at the former home of his Gem. He is visiting in Idelphigh.

Myrtle Douglas is visiting with her sister, Mabel, in Gem.

Work started on New Hall

Due to heavy rains, and 'let up' in the strenuous work of past weeks, the Stampede Committee saw it 'big chance' to start the new hall.

At about eighteen men, and several teams turned out Tuesday morning. By seven o'clock the first sod, Mr. Royer followed, the track for the basement is well under way. We have big hopes—Real Hopes now for a hall for the Stampede, August 3rd.

Scout Notes

A special meeting of the 1st Troop of Basasso Boy Scouts was held in the school on Wednesday, June 29th, with a very small turnout. However, a larger congregation attended the regular meeting held on Thursday night, when the Troop rehearsed their program for the Dominion Day Celebration.

On Friday, July 1, as Cadets, the Boys paraded at the School at 1.15, and marched around the track to take their place on the grandstand. Here under Cadet Captain Bob Currie they demonstrated their ability with rifles for a period of fifteen minutes or more.

At 2.30 again they assembled at the school, only this time as Scouts and marched to their place in front of the grandstand to undergo a few of the usual calisthenics. At the finish of this demonstration the Scouts were dismissed for the remainder of the day.

As yet nothing is absolutely definite as to the whereabouts of the 1938 camp, but arrangements will be completed shortly.

Harry Hansen of Brooks was in Basasso on Wednesday for a short time while on his way to Calgary to take in the Stampede.

Oliver Henry, of Rainer, was in Basasso on July 1 to take in the Basasso Stampede.

BASSANO RECORDER

FLOYD T. CARY,
Publisher.

THE EMIGRANT TIDE

LAST WEEK the Recorder had something to say in connection with a report of the emigration to Canada of twenty-five families of Poles from Warsaw, Poland. As may be expected our reaction to the description of the Polish emigrants as "settlers" to another continent by the Danish Consular General of Canada met with our hearty approbation.

This High Danish official recently made the statement that he would like to see more of his countrymen take up residence in Canada. Such a statement will at once find a hearty welcome in every part of Canada, more particularly in those parts which have been blessed by settlers from Denmark, or, for that matter, from any of the other Scandinavian countries.

Compared to settlers from other countries which have been allowed to come into Canada almost in unrestricted fashion, the Danes, the Swedes, and the Norwegians are most acceptable and make ideal citizens. It is seldom that the average Scandinavian spends more than the requisite five years before he applies for his naturalization papers. It may be said to the everlasting credit of the settlers from those countries in this District that it was not necessary to wait for a promised dividend before they decided to take that step. They had already done so, being content to accept and discharge their duties as British citizens minus bribery or other unorthodox inducements.

Craving no special privileges and having none bestowed gratuitously upon them, achievements in their respective communities are worthwhile compared to those who have sought to succeed in maintaining their racial identities. By all means, if the emigrant tide ever again turns towards the shores of Canada, let there be more Scandinavians, if only to avoid the price structure of additional problems for future generations of Canadians to deal with.

A BETTER FEELING

CLOUDY RAINS, following previous scattered showers, in the districts surrounding Bassano, have relieved for the time being the feeling of tension which was creeping over the whole community. Barring hail of severe proportions, the prospects for a fair crop look good at the moment, and, as the price structure should collapse as it has done in the past, farmers may earn some reasonable reward for their years of effort. It is coming to them, particularly those on the non-irrigated areas.

For the third year the paradox of plentiful food crops and no market will immediately present itself. For them their cash market will consist of the larger dairies at lessened prices. In view of this pending certainty it might be worth while for the individual farmer, and the district as a whole, to canvas the situation on the prospects of feeding the surplus fodder in a more or less wholesale manner.

TALENT AND TACT

CONSCIOUSLY, PERHAPS of ability above that of some of their fellow men, capable of generosity and affection, able and willing to serve without hope, or expectation of reward, many wonder why success fails to crown their efforts or dislike follows their every action. They probably possess not that, fault that "taints all their good like a dead dog in a green lane."

Talent is power, and power knows what to do. For talent is he, who, having talent, possesses also tact. For tact is it and skill knows how to do it. But if tact, in the absence of superior talent, is to quote G. H. Lorimer, merely "the knack of keeping quiet at the right time, of being so agreeable yourself that no one can be disagreeable to you; of making inferiority feel like equality" then it smacks of diplomatic hypocrisy, — that kind which adopts and follows religiously the old and nevertheless true maxim that "a drop of honey catches more than a gallon of gall."

That may be diplomacy which, without measure of talent, in the eyes of discerning men, should be properly assted. Likewise it might make the road easier for some, if discerning men, recognizing a measure of talent in their fellow men, accompanied by the saving grace of tact, would exercise more of that desirable quality themselves.

CANADA'S DEFENCE POLICY

CANADA'S DEFENCE policy, if she has one, and her external relations, particularly as applied to Great Britain have taken the spot-light, and are liable to remain there for some time to come.

A few weeks ago the Prime Minister sought refuge under a time-worn parliamentary subterfuge to dodge a question on the latter point. In the dying moments of the session just ended the point was again raised from which it would appear that some offer has been made by the British Government to raise and train at the expense of the British Tax-Payer, in Canada, a Canadian Branch of the R.A.F. To this Mr. King replies that it is not the policy of the Government of Canada to permit any military forces, not under the direct control of the Canadian Government, to operate or be trained in Canada.

Mr. King did not deny that such an offer had been made. If such an offer was made then Mr. King either said too much or too little, and apparently he is not going to be allowed to forget it. Senator Meighen has raised the point sharply and the probabilities are that it will become an issue of some importance between the Government and the Opposition, and will involve Canada's whole position as a partner in the British Commonwealth, not only in the matter of the benefits to be derived, but with respect to the obligations arising from that association.

A CONTRAST

IN YEARS gone by, before 1935, in order to develop a new Province and provide it with the multilateral services demanded by the public, and latterly to meet the onslaught of the depression accompanied by poor and poorer prices, various Governments of the Province borrowed money on which it was agreed interest would be paid at varying rates. Until the election of the present Administration that interest was paid in terms of the contracts without default. Admittedly the charges bore heavily on the public purse. At any rate one of the acts of the present Government was to reduce arbitrarily and probably unlawfully, the interest rate paid by one half. Since 1935 the Government has been steadfast in the pursuit of that policy.

Some years ago, also before 1935, The Alberta Wheat Pool, at the time labouring under financial difficulties of the very gravest nature, and to provide a fund to cover over-payments made on the 1929 crop following the price collapse in that year, borrowed a substantial sum of money from the Provincial Government of the day. The Wheat Pool agreed to pay interest on that money at five per cent per annum for the period of the principal in annual instalments. Those instalments and that agreed on interest have been paid promptly on the due date since the agreement was made.

TO SEE OURSELVES AS OTHERS SEE US." — Burns.

From Our Exchange Columns

ASTUTE DISALLOWANCE

WE DO NOT presume to match political astuteness with Mr. King, and so instead of making a statement we make an enquiry. Why the need to delay disallowance of those two Alberta Acts until just before the coming of the Minister of Justice and the Inspector of Insurance had their minds made up long before. The reason given in Ottawa was that decision was being withheld until after the Saskatchewan elections. Again we enquire — our respect for Mr. King's political judgment rating high — what effect would an earlier decision have on the Saskatchewan election? Surely the result of the elections had no effect on the Government's decision. Whether the Acts should or should not be disallowed must surely have depended upon the Acts themselves and not upon the result of an election in a neighboring Province. Something that happened after the Acts were passed could not have affected their validity. — Vulcan Advocate.

PENITENTIARIES

WHETHER THE Government acts upon it, or not, but that report on Canadian penitentiaries was something to make people sit up and take notice. That should be a hint to Turgeon. When he is next sent out to Royal Commission something the people want something more than a bed-time story. Let's hear praise for what is good, and let's tear apart what is rotten so that people can see why it is rotten. — Claresholm Local Press.

"GIMME" VS. SANITY

GOVERNMENT, according to the new saviours of democracy is not the same economic administration of affairs of state, but is a corruption from whence untold wealth will flow unceasingly. The more fantastic, the more mysterious the "gimme" plan the greater its chance of acceptability by the credulous and unthinking. To pay one's way is no longer the mark of integrity. Only the dumb and foolish honestly meet their indebtedness. A debtor may be richer than his creditor but the debtor is a martyr while a creditor is a leech or worse. This state of affairs is tacitly encouraged by blanket provincial statutes confascatory in intent and purpose. The strength of a nation lies in the good character and integrity of its people. Political dishonesty spreads insidiously like a cancer and if not checked mat will destroy the citizenry, the community and the state. — Hanna Herald.

UTTER-FUTILITY

UNFORTUNATELY, disallowance does not clarify the Alberta scene. It is clear or should be by this time, that Social Credit cannot be held within the framework of the Constitution. Reasonably, therefore, Mr. Aberhart and his government could be expected to resign. But as the legislation applied demonstrates, Alberta is not in the control of reasonable men, and the thought of the Government doing a reasonable thing can be discarded. Another course would be for him to reverse his policies and get back to sound business. But this also requires him to admit the futility of what he has attempted. Even if he could do it, it is questionable if he has not gone too far in dishonesty ever to regain public confidence. The alternative is to go along for the rest of his term passing impossible legislation. If this is to be the road, and the record suggests it is, we suspect the great mass of the people of Alberta will rule otherwise. — Toronto Globe and Mail.

CONSCRIPTION

BRITAIN'S PRIME MINISTER has emphasized that it is not his Government's intention to introduce military conscription in peace time. But a sensation in Parliament followed the admission that the outline of a conscription bill has, in fact, existed, ever since 1922 and has been considered by successive Governments.

The British people have deep-rooted detestation of forcible enrollment for military service. In the World War they clung to the practise of voluntary enlistment for two years and raised forces of more than 3,000,000 without resort to conscription. Yet in the end, when conscription was at last applied, it was grudgingly admitted that it might have been better if it had been adopted at the start. Recruiting appeals had drawn men into the army who would have been more usefully employed in industry, and in the course of war it was necessary to bring back into civilian life thousands who were urgently needed in the home factories.

In the event of a major war, conscription would not doubt be quickly adopted for the British armed forces. But expert opinion in England inclines to the view that in a new war in which Britain might be involved there would be no attempt to conscript enormous armies on the scale of the last World War for use on the continent of Europe. — That Britain would concentrate attention on the Navy and the Air Force, and a highly efficient but moderate-sized, punitive force for use at strategic points.

Even if such a plan were tenaciously adhered to the fact would not be altered that the whole man power of Britain would ruthlessly be turned to work which would be none the less war work because done at home. These circumstances happily, have not arisen. They are foreseen as consequences which would follow if Europe were insane enough once again to tolerate a conflagration. The fact which Great Britain faces is that of increased and increasing preparedness for war, including plans for that sort of subjection to authority which would involve at least temporarily a general loss of liberty. — Christian Science Monitor.

MARKETS AND WAR — OR PEACE

MR. GEORGE LANDSBURY is quite right in the contention he has put forward in the British House of Commons to the effect that the problem of relieving world tension is largely one of economics. Actual warfare, it is true, may arise from causes other than physical wants. But need of markets has been a real if mistaken incentive to aggression.

In any event to bring hungry peoples and unmarketable crops into closer relationship with one another can only do good whether it be tariffs, quotas, monetary restrictions or transport or marketing deficiencies that are now keeping them apart.

Mr. Paul Van Zeeland's report making practical suggestions for such reform deserves therefore all the attention which Mr. Lansbury declares it should receive. Part of that attention, however, should be directed to the possibility of harmonizing that program with the reciprocal trade plan which Mr. Hull already has succeeded in bringing markets, and producers into profitable contact in a large area of world trade. — Christian Science Monitor.

Recently the Pool paid to the Government \$453,250 representing the annual installment of the principal and the interest. No request was made by the Pool to the Government for the interest. Such a request might have been justifiable and reasonable. Likewise it is safe to say that what was sauce for the goose would be sauce for the gander, that, if consistency is the reduction of 50 per cent in the interest rate payable to it. What was that about "Do unto others?"

Ask The Man Who Uses
Watkin's Fly Spray

He will tell you that Watkins Fly Spray costs less, because it goes further. You get more for your money as a result. It flies knocked down by known as clean, effective and economical. They knock down the Watkins Fly Spray stay down. Kill them and they won't bother your cove while you are milking. It's clean, odorless, and will not taint milk nor gum up the hair of the cows.

I am taking orders now for immediate delivery — and remember, the price is right. 50c per Imperial Quart or \$1.50 per Imperial Gallon.

Farm Women's Week in July and August

Farm women will gather at the school of agriculture, Vermilion from July 5 to 8 inclusive to attend the 30th annual Farm Women's week at Olds, August 1-4. The course is open to all women of Alberta and it is not necessary to attend for the four days. There will be lectures on a variety of topics by the instructors in domestic science, sewing, home economics, preservation of foods, home decorations etc. The instructor in horticulture will have several periods of growing of vegetables, flowers and shrubs. This will be outside periods the grounding material on the school grounds forming the basis of the talks. There will be two evening meetings with talks on literary and historical subjects. No fee for the classes will be charged.

The Industrial East Spends over \$40,000,000 with the Western Farmer each year

Any fellow who consumes over \$40,000,000 worth of Western goods is worth knowing. And when you know him, you'll find he's a pretty good fellow — a worker and a family man like yourself, who likes to keep busy.

Your purchase of a Canadian-built car helps keep him busy and on a payroll. For Eastern automobile plants alone employ over 18,000 workers and in turn, spread employment and purchasing power — over many other industries, including textiles, paints, glass, chemicals and steel.

Sure, it's a good thing to know that the Eastern industrial worker is busy and happy and in a position to maintain and augment his purchases which in 1930 alone included over 80,000 tons of fresh dressed meats; 175,705 head of cattle, 21,144 calves and 41,557 hogs to say nothing of 10,000 tons of butter and poultry, eggs, honey, grain products and other commodities to the value of more than \$15,000,000.

For statistical and further information about this industry, write to
Automotive Industries, 1006 Lansdowne Building, Toronto.

QUIET WEDDING SOLEMNIZED AT CLIFFGARD HOME FRIDAY

MONTGOMERY—CLIFFGARD

A quiet wedding was solemnized on Friday, July 1st at two o'clock, at the home of Mr. and Mrs. A. A. Cliffgard of Arrowwood, when their daughter, Lila Joyce, was united in marriage to Mr. L. Earl Montgomery, eldest son of Mr. and Mrs. T. Montgomery of Husker. The bride was attended by her sister, Miss Evelyn Cliffgard, and the best man was Mr. Ben Snyder of Wayne. J. H. Brubaker of the Brethren Church performed the ceremony.

The bride was dressed in pale pink net over tulle, and wore a corsage of roses. The bridesmaid wore a pale shade green georgie dress. Miss June Cliffgard played the wedding march, and during the signing of the register sang "O Promise Me". After the ceremony, sixteen sat down to a wedding breakfast. Only members of the immediate family were present. Miss Madeline Holland and Miss Dorcas Roberts assisted in the serving. Mrs. T. Montgomery, mother of the groom, poured tea.

The happy couple left by motor to spend a short honeymoon at Baffin and Lake Louise. On their return they will reside at Husker.

The Arrowwood Old Guides and Brownies left on Monday morning for a week's camping; the Guides going to Bowden Park and the Brownies going to Sylvan Lake.

Mrs. Newton and daughter, of Red-Scar were visiting in Arrowwood over the week-end at the home of their daughter, Mrs. R. Dahl. They left for Edmonton on Sunday where Miss Dahl will mark papers.

More Land to Grass

Huger Crops on Smaller Acreage as Possible More Land To Grass

Experiments conducted at Scott, Sask., experimental station showed that, whereas the average yield of wheat on summer-fallow land over a period of five years was 14.3 bushels per acre, the average winter barley and mature and fertilizer were applied was 23 bushels per acre.

That's an increase of nearly 60 per cent.

Now of course we realize that the one thing we have more of than anything else is land, but at the same time we wonder whether it is good business to do all the work on 100 acres of land when sixty acres would produce the same results. Right now we are so bitten by the bug of mass production that we would rather work 100 acres of land to get the same results as if we worked only sixty acres.

The question is that today we have in wheat in the West some 23,000,000 acres. If we could grow the same amount of wheat with 15,000,000 acres in crop, and had the other 8,000,000 in grass, raising livestock, perhaps we would have a little more stability about our agriculture. We'll be told that we have no market for the livestock we now produce, but we can answer with the statement that a good many times in the past few years we've had no feed to produce the livestock. Certainly if we had a third of our present wheat land in grass and forage crops, and if we used the manure produced to better our wheat crops there would be a lot less soil drifting.

In any event, the Scott figures are encouraging. It may be that it is not absolutely necessary that we should let the West blow away —
Lethbridge Herald

Unity Council Exec. Appointed

CALESTY—July 1.—Setting up of an executive of five members from the personnel of the Provisional Unity Council was announced today by John T. McFarland.

Executive members are, Francis P. Austin, farmer, Ranfurly; Paul A. Parnall, farmer, Halkirk; S. A. Fox, Merchant, Innisfail; F. S. Grisdale, farmer, Olds; and George G. Ross, rancher, St. Kitts.

At the first meeting of the Provisional Council in Edmonton July 23-24, the members favored the creating of a five person executive and asked their chairman to make the necessary appointments.

For of common sense to keep within the limits, Success is empty which is gained at the expense of a wrecked body. Health without wealth is preferable to wealth without health.

A Man's Strength and a Woman's Beauty against nature's fury and the law's revenge. A most exciting the woman he worships; a most romantic adventure by Nordhoff and Hall, authors of "Mutiny on the Bounty"

ORPHEUM THEATRE

How Does Life Insurance Benefit The Farmer's Wife and Children?

Answer.—If the farmer has Life Insurance, the wife and children know that they will not be in want in case of his death.

Question.—How would insurance help?

Answer.—It would provide money for living expenses, to pay debts, meet mortgage payments, hire help, avoid sale of the farm at a sacrifice.

Q.—Couldn't this be done through ordinary savings?

A.—Usually a farmer leaves only a small amount of cash. Nor can he be sure to live long enough to save an adequate sum. Only through Life Insurance can he, with a minimum of saving each year, have the necessary money available in case of death.

Q.—How do the children benefit?

A.—The father who has Life Insurance is sure that the children will have the home, care and education that he intended.

Q.—How does Life Insurance benefit the farmer himself?

—If he lives to a retiring age, his insurance will provide a cash income to care for him.
